

ENVIRONMENT POLICY STATEMENT

We, as Coca-Cola İçecek A.Ş. (CCI) run our business with respect to the environment. Not only do we operate in full compliance with national laws and regulations in the markets where we operate and with all the standards established by The Coca-Cola Company (TCCC), but we also go beyond the expectations of our stakeholders.

In line with our approach to environmental impact management, we have determined three main priority areas:

- ✓ Energy Management and Climate Action
- ✓ Water Management
- ✓ Sustainable Packaging
- ✓ Biodiversity Conservation

Our long-term goals are to ensure the long-term viability of our business by being proactive and innovative in protecting the environment and to be recognized as one of the most responsible corporate citizens by all stakeholders.

Working towards these goals, we:

- Implement environmental management systems in line with ISO 14001 to monitor and continuously improve our environmental performance.
- Act with awareness of future demands of natural resources and therefore work to reduce the environmental impact of our operations.
- Integrate environmental strategies, objectives, and goals into our business plans to maintain environmental sustainability as a key component of our operations.
- Implement water minimization projects in our manufacturing operations and perform wastewater management at the highest possible level in accordance with TCCC requirements and national laws in every location where we operate.
- Assess the vulnerability of our water sources and prepare long-term source protection plans to preserve water quality in the water basins of our operating region, to decrease our environmental risks, and to be a leader in water management.
- Focus on energy efficiency in all our business processes in line with ISO 50001.
- Report on our GHG emissions, goals, results and activities within the scope of ISO 14064.
- Undertaking studies focused on decreasing our energy usage and reducing our carbon emissions sourced from cooling equipment in line with our climate protection strategy.
- Control and ensure that our air emissions resulting from manufacturing operations and other activities remain within the limits specified by legislation.
- Carrying out, in partnership with our suppliers, recycling practices that reduce our source consumption and contribute to the development of lightweight and fully recyclable packaging materials – aiming to be a pioneer in the FMCG sector with our sustainable packaging practices.
- Recycle as much of our produced waste as possible and dispose of it safely to reduce its environmental impact.
- Work for the development of environmental awareness in our workplace and strive to create the same awareness amongst all stakeholders with the help of formed initiatives and joint ventures.

As CCI, we commit to annually (or at specified intervals) reporting on this policy statement's output via our Sustainability Report.
