Forward Looking Statements

This presentation includes forward-looking statements including, but not limited to, statements regarding Coca-Cola İçecek's ("CCI") plans, objectives, expectations and intentions and other statements that are not historical facts. Forward-looking statements can generally be identified by the use of words such as "may," "will," "expect," "intend," "estimate," "anticipate," "plan," "target," "believe" or other words of similar meaning. These forward-looking statements reflect the current views and assumptions of management and are inherently subject to significant business, economic and other risks and uncertainties. Although management believes the expectations reflected in the forward-looking statements are reasonable, at this time, you should not place undue reliance on such forward-looking statements. Important factors that could cause actual results to differ materially from CCI's expectations include, without limitation: changes in CCI's relationship with The Coca-Cola Company and its exercise of its rights under our bottler's agreements; CCI's ability to maintain and improve its competitive position in its markets; CCI's ability to obtain raw materials and packaging materials at reasonable prices; changes in CCI's relationship with its significant shareholders; the level of demand for its products in its markets; fluctuations in the value of the Turkish Lira or the level of inflation in Türkiye; other changes in the political or economic environment in Türkiye or CCI's other markets; adverse weather conditions during the summer months; changes in the level of tourism in Türkiye; CCI's ability to successfully implement its strategy; and other factors. Should any of these risks and uncertainties materialize, or should any of management's underlying assumptions prove to be incorrect, CCI's actual results from operations or financial conditions could differ materially from those described herein as anticipated, believed, estimated or expected. Forward-looking statements speak only as of this date and CCI has no obligation to update those statements to reflect changes that may occur after that date.

Important Disclaimer

Based on the CMB's decision dated 28 December 2023 and numbered 81/1820 and the "Implementation Guide on Financial Reporting in High Inflation Economies" published by the POA with the announcement made on 23 November 2023, issuers and capital market institutions subject to financial reporting regulations applying Turkish Accounting/Financial Reporting Standards will apply inflation accounting by applying the provisions of TAS 29, starting from their annual financial reports for the accounting periods ending as of December 31, 2023.

As of March 31, 2026, an adjustment has been made in accordance with the requirements of TAS 29 ("Financial Reporting in High Inflation Economies") regarding the changes in the general purchasing power of the Turkish Lira. TAS 29 requirements require that financial statements prepared in the currency in circulation in the economy with high inflation be presented at the purchasing power of this currency at the balance sheet date and that the amounts in previous periods are rearranged in the same way. The indexing process was carried out using the coefficient obtained from the Consumer Price Index in Turkey published by the Turkish Statistical Institute ("TUIK").

The relevant figures for the previous reporting period are rearranged by applying the general price index so that comparative financial statements are presented in the unit of measurement valid at the end of the reporting period. Information disclosed for previous periods is also presented in the measurement unit valid at the end of the reporting period.

However, certain items from our financials are also presented without inflation adjustment for information purposes in order to give an idea of our performance relative to our 2026 forecasts, which we announced at the beginning of the year and which we stated were based on the financials without inflation adjustment. These unaudited figures are clearly labelled where relevant. All financial figures without such disclosure are reported in accordance with TAS29.

Delivering **Strong Balanced Growth** and **Value** Amid Elevated Geopolitical Tensions

HIGHLIGHTS:

Solid start to the Year

- Delivered balanced results across our diversified geography, despite ongoing macroeconomic and geopolitical volatility
- Central Asia-led momentum; broad-based international growth and resilient volume in Türkiye
- **Stills** outperformed with 30.3% growth, while **sparkling increased** 4.5% cycling a strong base
- Excluding TAS 29, **NSR/uc** reached **\$2.9** – the highest first quarter in the last decade

Quality Mix on Track

- **Immediate Consumption** share up by 105 bps to 25.5%, supported by both Türkiye and international markets
- **On-premise** share up by 123 bps to 31.1%, driven by Türkiye and international markets
- **Fusetea** surged by 47.4% y/y, boosting overall stills category performance

Strong Margin Expansion

- Cycling a low base, **gross margin expanded** by 592 bps y/y, driven mainly by Türkiye through timely price adjustments, favorable mix and disciplined cost management
- **EBIT margin up** by 529 bps y/y, driven by strong gross margin expansion and tight opex management
- **Net income up** 213.8% y/y to TL 5.2 bn, driven by improved operational profitability and lower net financial expenses
- **Positive FCF generation** at TL 462 mn
