Key rating drivers, as strengths and constraints, are provided below.

### Strengths

- Strong sales revenue and EBITDA generation capacity, despite a slight decrease in sales volume in FY2024,
- Low level of net debt to EBITDA multiplier supporting leverage indicators in FYE2024,
- Long-term maturity structure of financial liabilities and ability to access international resources,
- Solid cash flow metrics and positive NWC easing liquidity management and providing a cash buffer,
- Diversified revenue sources thanks to an extensive product portfolio and strong geographical presence,
- Compliance with corporate governance, effective financial management combined with a proactive approach to risk mitigation through commodity hedges,
- Maintenance of leading positions in the market,
- Having the potential to increase sales volume thanks to the low penetration of the beverage industry in the regions of CCI,
- Long-term agreement with TCCC and product portfolio consisting of highly recognized brands.

### Constraints

- Financing and operational expenses pressuring bottom-line results, despite offsetting through TAS 29,
- Short FX position, despite partially mitigated through international revenues,
- Relatively low level of paid-in capital, despite capital injection in FYE2024 and reasonable equity level mainly supported by accumulated profits arising from TAS 29 effect,
- Vulnerability of revenue composition to the risk environment of multiple countries,
- As actions for a global soft-landing gain prominence, decisions with the potential to adversely affect global trade are engendering considerable uncertainty.

Considering the aforementioned points, the Group's Long-Term National Issuer Credit Rating has been affirmed at 'AAA (tr)'. The Group's strong sales revenue, low level of net debt to EBITDA multiplier, solid cash flow metrics and positive NWC as well as short FX position and uncertainties in the global economy have been evaluated as important indicators for the stability of the ratings and the outlooks for Long and Short-Term National Issuer Credit Ratings are determined as 'Stable'. The Group's financial structure, sales and profitability performance, liquidity and leverage indicators will be closely monitored by JCR Eurasia Rating in the upcoming periods. The macroeconomic indicators at national and international markets, as well as market conditions and legal framework about the sector will be monitored as well.
